Meeting Notes for 2017-11-6

Members Present: Chris Bokkam, Richard Cunard, Braxton Cuneo, Andrew Emmott.

1. The meeting began with Andrew asking the team if there were any questions for him. The team did not have any questions.
2. Andrew then asked for access to the project github, believing that he had not yet received an invite. After checking, he found the invite buried in his emails, and accessed the github.
3. The team inquired about whether the requirements document required an abstract on the cover page, as Dr. Winters had confirmed that the document adhered to IEEE standards. Andrew stated that due to the slightly conflicting instructions, he would not mark down the assignment if the document was revised.
